Allan Alves

Brasília, Distrito Federal, Brazil
Phone: +55 (61) 98347-7341
Email: allanalves90@gmail.com
LinkedIn: www.linkedin.com/in/alvesallan

8 years of experience with native iOS applications development.
Working remotely since 2018

EDUCATION AND CERTIFICATIONS:

- Bachelor of Computer Engineering at UniCEUB, Brasília - DF, Brazil.
- Apple Developer Academy sponsored by Apple and local university partnership – Selected students to undertake a twelve-month study program, on topics such as software development, app design, startup creation, and digital economy – Brasília, Brazil.

MAIN EXPERIENCE:

- Experience building complex UI (View Code, SwiftUI, XIB, and Storyboard). Worked on building apps with social network, broker on trading platform, and financial charts for example.
- Preference to work with VIPER, Coordinators, MVVM or similar architectures or patterns.
- Intermediate experience with RxSwift, RxCocoa, and Combine.
- Worked with Objective-C constantly for three years and Swift for six years.
- Looking for gaining more experience with UI Tests and Unit Testing.
- Preference to work with SCRUM methodology and Atlassian tools (JIRA, Bitbucket) or similar.

RECENT POSITIONS:

- Senior iOS Engineer at Concepta Tech in Orlando, US – 1 year and 8 months (Jul 2020 – April 2022)

  Provided services to AdventHealth, a health care and hospital system operating in twelve US states. Helped build the iOS application that provides features such as telehealth video visits, appointments, prescriptions renewal, and viewing lab and radiology results.

  - Design and document new features
  - Identify and correct bottlenecks and fix bugs
  - Help maintain code quality and organization
  - Keep track of issues on a crash reporting tool

  Tech Stack: Swift, SwiftUI, RxSwift, Combine, Firebase Crashlytics, Amplitude Analytics, MyChart framework (healthcare system), Amwell framework (telemedicine system), Figma, Gitlab, JIRA, Git, Carthage, Confluence (Atlassian), Swagger, Slack, Postman, and Proxyman

- Senior iOS Developer at [K2 Partnering Solutions](#) in São Paulo, Brazil – 2 years and 5 months (Feb 2018 – Jul 2020)

  Built the [iOS application](#) of a tech recruitment platform that offers consultants a social network, referral system, job search, and features to manage and quickly submit timesheets, expenses, and invoices.

  - Keep track of App Store reviews and bring thoughts to the team
  - Improve and maintain CI tool and process
  - Maintain code quality and organization
  - Collaborate with the mobile team to plan, design, and ship new features
  - Collaborate with the back-end team to define and design APIs
  - Work closely with the UX team to identify issues and suggest improvements
  - Monitor crash reporting and UX analytics tools to identify and investigate issues
  - New architecture planning and major refactors aiming for scalability
  - Ensure the performance, quality, and responsiveness of the application
  - Keep project frameworks up-to-date and fix compatibility issues

  Tech Stack: Firebase (Crashlytics, Remote Config, Analytics), Bitrise (CI/CD), UXCam (UX Analytics), Zeplin, JIRA, Bitbucket, Git, Cocoapods, Confluence (Atlassian), Swagger, Salesforce (Chatter APIs, Mobile SDK, Marketing Cloud SDK, Service SDK), Branch.io (Deeplinks), Google Places SDK, Node.js, Dialogflow, and Twilio

- iOS Developer at [Stefanini](#) in Brasília, Brazil – 1 year and 8 months (Jul 2016 – Feb 2018)

  Provided services to [Banco do Brasil](#), a Brazilian investment bank, and financial services company with more than 60 million clients around Brazil. Helped to build features of the [BB Investimentos app](#), such as a home broker, gold trading, and other types of investments.

  - Implement new features designed by the clients
  - Monitor crash reporting tool to identify and investigate issues
  - Prevent binaries sizes to increase too much
  - Eventual code refactoring to maintain quality
  - Work closely with the back-end team to give feedback and suggest improvements

  Tech Stack: Swift, Objective-C, Cocoapods, Fabric Crashlytics, Charts (charts and graphs framework), Git, Postman, and Android

- iOS Developer at [Logo IT (Infosolo)](#) in Brasília, Brazil – 2 years (Aug 2014 – Jul 2016)

  Built internal experimental solutions and MVP applications for iPhone, iPad, Apple Watch, and Apple TV devices. Development and maintenance of a few clients' solutions as well.

  - Design (UI/UX and code), suggest features and build small experimental apps from the scratch
  - Monitor crash reporting tool to identify and investigate issues from many applications
  - Ship applications to App Store or internally
  - Work closely with the back-end team to give feedback and suggest improvements

  Tech Stack: Objective-C, Git, SVN, Cocoapods, tvOS (Apple TV), watchOS (Apple Watch), JIRA, Bitbucket, Swagger, and Parse Platform
